

Appendix B: Additional Sources for Journal Title Abbreviations

ISO 4* of the International Standards Organization is the recognized authority for abbreviating words in journal titles. The database for this standard, maintained by the ISSN International Centre [<http://www.issn.org>] in Paris, is available only by subscription.

The Source List below is an attempt to locate alternative sources for journal title abbreviations for those titles not covered by the *List of Journals Indexed for MEDLINE* [<ftp://nlmpubs.nlm.nih.gov/online/journals/lji-web.pdf>]. All are considered authoritative within their specific area or discipline. Be aware, however, that while many of them use the ISO standard as their basis, some do not. For example, ISO does not permit abbreviations of the romanized words from titles appearing in character-based languages, eg., Chinese, Japanese, Korean, but some of these sources do permit it.

Source List

AIP style manual [Internet]. 4th ed. New York (NY): American Institute of Physics; c1990-1997 [cited 2007 Aug 17]. Appendix G: Journal title abbreviations; p. 46-54. Available from: http://www.aip.org/pubservs/style/4thed/AIP_Style_4thed.pdf
